### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

1. In view of the Appeal Brief filed on July 10, 2006, PROSECUTION IS HEREBY REOPENED. A new ground of rejection set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Leung (US Patent 6,963,918 B1) in view of Igarashi et al (US Publishing 2001/053694 A1).

Regarding to claim 11, Leung discloses a method of transmitting a packet in a wireless network (fig. 2), the method comprising receiving the packet from a mobile station 210 at a node 204 for routing the received packet to a service provider server 226 (col. 5 lines 2-8); determining a care of address for at least one of a user and a session associated with the packet (col. 5 lines 28-32); and selectively causing the node to assume a role of a home network for the mobile station based on the care-of-address (col. 5 lines 32-35; based on the care of address, the packet is forward to the FA 204 rather than the HA 224 and thus the FA 204 act as the home agent).

Leung fails to teach determining a predetermined policy for at least one of a user and a session associated with the packet.

However, Igarashi discloses a network system that provides each terminal user with differentiated service, comprising determining a service profile (predetermined policy) for a user and a session associated with the packet (fig. 20 page 7 paragraphs 0120-0122).

Thus, it would have been obvious to a person of ordinary skill in the art to employ such service profile as taught by Igarashi in Leung's system to determines the optimal route of the packet.

***Allowable Subject Matter***

4. Claims 1-10 and 12-23 are allowed.
